

eAssistant - A clever way to calculate!

Professional online calculation software for the mechanical engineering

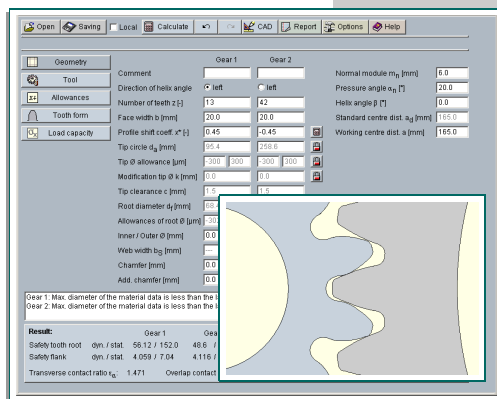

eAssistant - the engineering assistant

The eAssistant is a web-based calculation software for the mechanical engineering industry. Calculate, dimension and optimize mechanical elements such as

- Shafts, bearings
- Gears,
- Shaft-hub-connections

The eAssistant combines the advantages of a standard calculation software and an innovative web solution.

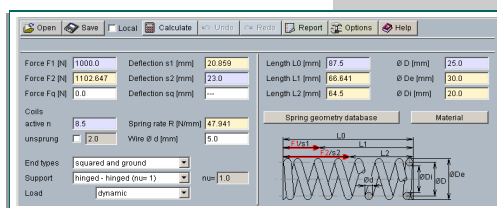

eAssistant CAD plugins

You would like to connect calculation and design? Then use the eAssistant CAD plugins for SolidWorks, Solid Edge, Autodesk Inventor and Catia.

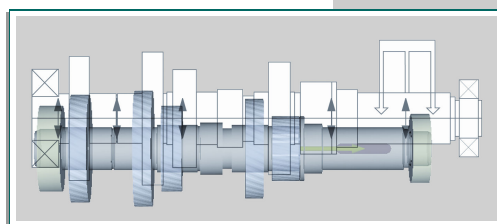

Pay only what you use!

The eAssistant provides a variable cost structure - for occasional and permanent requirements.

- There are no invest-, maintenance- or fixed costs
- Costs: starting from 27 cent per minute*

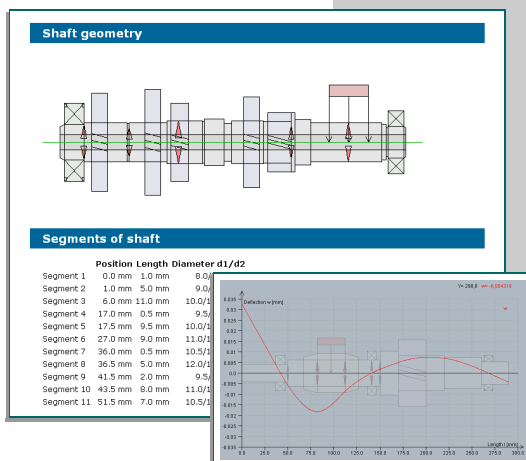

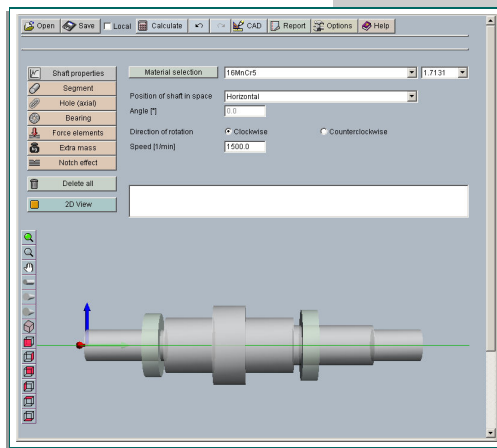

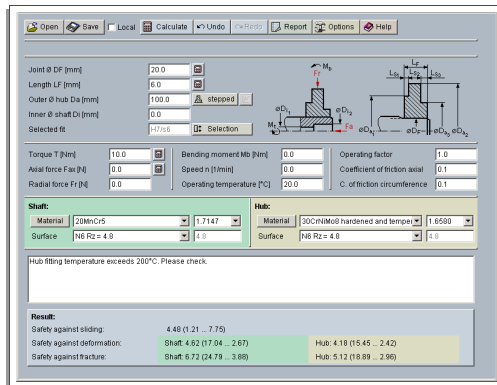

With the eAssistant

- Work immediately without any installation
- A latest version is always available worldwide
- Use generally accepted calculation methods (e.g., DIN and ISO)
- Save precious time

*referring to the use of a 100 hours package

The eAssistant offers

- Easy calculations based on accepted calculation methods
- Dimensioning functions
- An user-friendly, intuitive interface
- An online working environment with project management, open and save options
- Calculation reports with all detailed input values (HTML and PDF format)
- Detailed results, thus the calculation is easily comprehensible
- A selection of standard values out of material and geometry databases
- A graphical representation of results

Since several years the eAssistant is successful on the market. Well-known, including engineering companies, medium-sized companies as well large companies use the eAssistant.

A qualified team

GWJ Technology GmbH, based in Braunschweig, is specialized in calculation software for the mechanical engineering, e-business and e-engineering. We have long experience in calculation and software development in the field of mechanical engineering. Extensive knowledge and high quality standards are a part of the development of the eAssistant.

In addition to the eAssistant we would like to support you with our engineering services. Our focus is on the field of drive technology: from high-speed shafts to the optimizing of gears.

Further information, a full description as well free test facilities are available on the web site www.eAssistant.eu or directly from GWJ.
